Question 01

7 marks

2024 May/June Paper 41 Question 1

Main topic: Topic 12: Experimental techniques and chemical analysis
Cross-topic links: Topic 11: Organic chemistry
Answer source label: 0620_s24_ms_41.pdf

1(a)	• Contact process
1(b)	• distillation
1(c)	• electrolysis
1(d)	• fractional distillation
1(e)	• fermentation
1(f)	• cracking
1(g)	• chromatography

Easy explanation / reminder

- Electrolysis tip: cations go to the cathode and gain electrons. Anions go to the anode and lose electrons.
- Acids/salts tip: for soluble salts use excess insoluble base/carbonate, filter, then crystallise. For insoluble salts use precipitation.

END OF ANSWER

Question 02

7 marks

2024 May/June Paper 43 Question 1

Main topic: Topic 12: Experimental techniques and chemical analysis

Cross-topic links: Topic 11: Organic chemistry, Topic 7: Acids, bases and salts, Topic 4: Electrochemistry, Topic 1: States of matter

Answer source label: 0620_s24_ms_43.pdf

1(a)	• Haber (process)
1(b)	• electrolysis
1(c)	• filtration
1(d)	• catalytic addition
1(e)	• chromatography
1(f)	• fractional distillation
1(g)	• titration

Easy explanation / reminder

- Electrolysis tip: cations go to the cathode and gain electrons. Anions go to the anode and lose electrons.
- Acids/salts tip: for soluble salts use excess insoluble base/carbonate, filter, then crystallise. For insoluble salts use precipitation.
